WORK EXPERIENCE

Full-Stack Software Engineer

Tracer Labs

January 2023 - current / Remote

- Led architecture, design, and development of 20+ new features following common security practices and development design patterns
- Built 100+ unit tests to verify the functionality of user interfaces, back-end processing, connectivity, and relational database interactions
- Engaged in requirements analysis, High Level Design, Low Level Design, and complex code development for 10+ applications.
- Cultivated action mindset in ever-changing project priorities and adapted to various requirements to deliver high-quality solutions in the company's best interests.

Software Developer

Robinhood

February 2022 - January 2023 / Westlake, Tx

- Assisted in developing a CRM software upgrade (Salesforce) that contributed to cost savings and improved customer service by 73%
- Tested software for bugs and operating speed, fixing bugs and documenting processes to increase efficiency by 18%
- Collaborated with a team of developers to implement RESTful APIs in Django, enabling analytics team to increase reporting speed by 24%
- Brainstormed and implement ideas and feedback into app's development
- Selected as the top performing developer by the technology team

PROJECTS

Tripper

Lead Full-Stack Software Engineer

May 2023

- Managed a 5-member team through the development pipeline for the project, from ideation to testing and deployment, using Agile and Scrum methodologies to deliver project on time.
- Developed RESTful API routes to make a CRUD application which allows a user to track and plan a trip by adding, deleting, updating and viewing all details of a trip
- Implemented authorization and authentication using JWT and MongoDB for efficient data retrieval
- Designed the user interface using Tailwind and CSS to optimize the user experience

AutoScape

Full-Stack Software Engineer

Apr 2023

- Developed a single-page application to manage various aspects of an automobile dealership to maintain organized records, boosting business efficiency by 70%
- Implemented form submission for client-side appointment scheduling and search/filter components to enhance user experience, increasing website traffic by 68%
- Integrated RESTful APIs into separation sales and service microservices with PostgreSQL, maintaining user authentication and client information security
