Portfolio

SKILLS

Languages - Javascript/ES6+, Python 3, Java, HTML5, CSS

System Design - Monoliths, Microservices, Domain-driven design, Message passing, Event sourcing, CI/CD, Object Oriented Programming, MVC Architecture

Front End - React, React Hooks, Redux Toolkit, Bootstrap, Tailwind, WebSockets, DOM Manipulation

Back-End - Django 4, MySQL, SQLite3, PostgreSQL, MongoDB, FastAPI, RESTful API, RabbitMQ, Spring Boot

Tools - Google Cloud, Firebase, Docker, Git, Canva

EDUCATION

FDM

Software Development Program

Aug 2023 - Oct 2023

FrontEnd Masters

Java Fundamentals

July 2023 - July 2023

Hack Reactor

Advanced Software Engineering Immersive Program Certificate

Nov 2022 - May 2023

University of Texas Arlington

Bachelor of Science, Biology

Aug 2016 - May 2020

PROJECTS

DoorHopper

Oct 2023- Present

Tech Stack: Javascript, Firebase, Google Cloud APIs, React, CSS, Bootstrap

- Developed a web-based application to facilitate the management of solar sales leads, prospects, and appointment scheduling
- Implemented Spring JDBC and MySQL to store pet details, species, and shelter association for adoption
- Employed RESTful endpoints and Thymeleaf for a user-friendly frontend GUI interface

Hackathon for Social Good - Women Who Code

Dec 2023

Tech Stack: Java, JavaScript, React

- Participated in a fast-paced 12-hour event focused on addressing human services and promoting an end to poverty
- Collaborated with a team of 4 to design and develop an application aimed at connecting individuals in need with nearby shelters and food resources
- Implemented advocate and user roles, integrated data from various sources using Java for the back-end, and created an intuitive user interface with React

Tripper

Apr 2023 - May 2023

Tech Stack: Python, Javascript, FastAPI, React, Redux, Bootstrap, MongoDB, JWT, Gitlab Pages

- Developed RESTful API routes to make a CRUD application which allows a user to track and plan a trip from start to finish
- Implemented authorization and authentication using PostgreSQL and FastAPI for efficient data retrieval
- Designed the user interface using Tailwind and CSS to optimize the user experience

AutoScape

Mar 2023 - Apr 2023

Tech Stack: Django, Python, Javascript (React), Bootstrap, PostgreSQL, Microservices

- Created a Django Web application that manages car services, sales, and inventory
- Implemented and deployed a microservice using PostgreSQL to enable users to create and view services
- Integrated RESTful APIs into microservices to enable data retrieval and utilized them to develop a React-based front-end with JSX

PROFESSIONAL EXPERIENCE

Customer Relationship Associate - Fidelity Investments

Dec 2023 - Present

- Assist customers in opening, managing, and closing financial accounts, ensuring compliance with regulatory requirements.
- Address customer inquiries, providing accurate and timely information on financial products and services.

Junior Java Engineer Trainee - FDM

Aug 2023 - Oct 2023

- Participated in the software development program, a 12-week online course designed to encourage and offer support in starting careers in technology, fostering diversity in the tech industry
- Received comprehensive Java software development training, including fundamentals, object-oriented programming, code organization, Agile development, and ongoing support through webinars, group work, and coding assignments

Financial Representative - Robinhood Investments

Jul 2020 - Nov 2022

- Recommend business products to clients based on investment goals. Assist with withdrawals, deposits, navigation of technical products. Resolve customer issues related to account discrepancies, transaction errors, and other financial concerns.
